Cover Letter

Dear Hiring Manager,

I am writing to express my interest in an entry-level Information Technology or technical support opportunity. I am currently pursuing a Bachelor of Science in Information Technology at the University of Central Florida, where I have completed coursework in databases, programming, computer networking, security in computing, web applications, IT project management, and systems analysis and design.

Through my role as a Technical Associate at RK Garage Doors, I have gained experience analyzing website performance data through Google Analytics, gathering requirements for a digital scheduling system, and creating Excel dashboards to support customer service decisions. These experiences helped me understand how technology can improve everyday business operations when it is used clearly and purposefully.

I also bring academic experience with SQL, Python, C programming, Microsoft Office, Excel, Power BI, and data analysis. I enjoy solving problems, organizing information, and communicating technical ideas in a way that is easy for others to understand. I believe these skills would allow me to contribute positively to a team while continuing to grow professionally.

Thank you for considering my application. I would appreciate the opportunity to discuss how my technical background, coursework, and work experience align with your organization's needs.

Sincerely,

Nassim Boutayeb
